

Take control of cancer for your members

Cancer is the leading driver of healthcare costs, and cancer incidence continues to rise year over year

40% of people will be diagnosed with cancer in their lifetime.¹

#1 cause of death for working adults²

There are two ways to change the impact of cancer.

1. Catch cancer earlier

\$52K average savings from one stage shift^{3*}

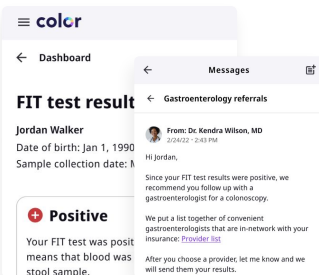

2. Ensure cancer treatment is well managed

\$19K estimated savings for each avoided hospitalization⁴

Color's Virtual Cancer Clinic:
a team of cancer experts for every cancer need.

At-home screening and fast, guaranteed imaging

Expert clinical team, including high risk experts

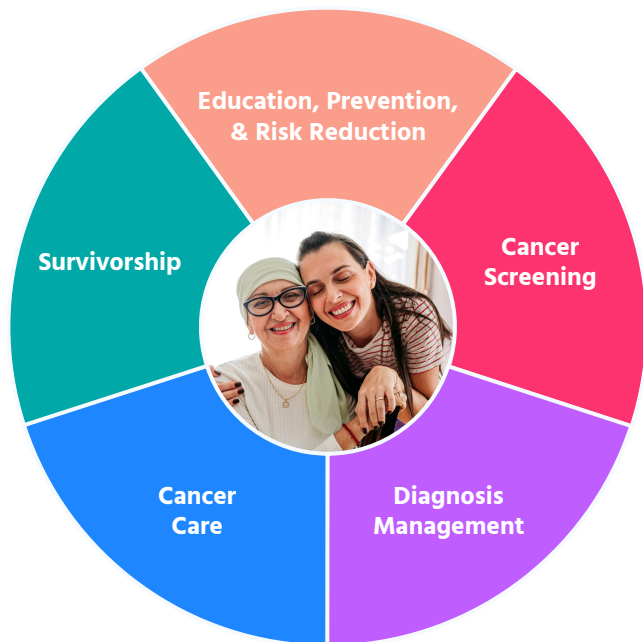

Robust patient support & mental wellness groups

American Cancer Society resources and support groups

The only comprehensive cancer care solution, in partnership with the American Cancer Society

Cancer requires a comprehensive approach. Here's how we do it.

Education

with trusted ACS resources that empower members to make better health care decisions

*Avg cost increase per cancer stage for colorectal, breast, cervical, lung, and prostate cancer, weighted to account for incidence by cancer type

The American Cancer Society (ACS) is a nonprofit organization that routinely publishes guidelines, and as part of this program, ACS contributes its expertise and educational materials on cancer screening and prevention and connects participants who contact ACS with ACS cancer-related information. A portion of the fees generated from this program will be used to support the ACS mission. ACS does not provide medical or clinical care.
